

GULZHAN RAIYMBEK

DATA ANALYST | Power BI Developer

Microsoft Certified Power BI Data Analyst (PL-300)

Business Intelligence | Business Analysis | SQL | Power BI | Python

Ann Arbor, MI | graiymbek@gmail.com | 734-730-4053

Professional Summary

Data Analyst and Microsoft Certified Power BI Developer (PL-300) with experience designing end-to-end Business Intelligence solutions using SQL Server, Microsoft Power BI, Microsoft Fabric, Python, DAX, Power Query, and dimensional data modeling. Experienced in analyzing complex business data, developing KPIs, validating data accuracy, and transforming data into actionable insights that support executive decision-making. Proven ability to collaborate with business stakeholders, gather reporting requirements, develop scalable semantic models, and deliver enterprise reporting solutions using Power BI Service. Experienced leveraging modern AI productivity tools, including ChatGPT and Microsoft Copilot, to enhance analytics workflows, automate repetitive tasks, and improve development efficiency while maintaining data quality and best practices.

Professional Highlights

- Microsoft Certified: Power BI Data Analyst Associate (PL-300)
- Designed and implemented an enterprise Business Intelligence reporting platform from the ground up
- Developed Power BI dashboards across healthcare, supply chain, finance, retail, and business operations
- Experienced in SQL Server, Python, Power BI, DAX, Power Query, and dimensional data modeling
- Skilled in data analysis, KPI development, data validation, executive reporting, and stakeholder collaboration
- built automated reporting solutions using ERP, SQL, Excel, and Power BI data sources
- Currently preparing for the Microsoft Fabric Analytics Engineer certification (DP-600)
- Built more than 50 Power BI dashboards in HealthCare, Business, Supply Chain

Professional Experience

Power BI Developer | NTH Consultants, Ltd. (April. 2025 - Present)

- Designed and delivered executive dashboards that enabled leadership to monitor project performance, staff utilization, revenue, proposals, backlog, and client performance through automated reporting.
- Partnered with executives and business stakeholders to gather reporting requirements, define KPIs, and translate business needs into data-driven reporting solutions.
- Integrated BST ERP data into SQL Server by developing SQL Views, Stored Procedures, Common Table Expressions (CTEs), and reporting queries.
- Designed scalable Star Schema semantic models supporting enterprise analytics.
- Built executive dashboards including PM Goals, Staff Utilization, Client Performance, Sales & Revenue, Proposal Performance, and Market Segment dashboards.
- Developed advanced DAX measures for utilization, revenue, backlog, proposals, sales, and year-to-date metrics.
- Implemented Row-Level Security (RLS) for employees, project managers, and executive leadership.
- Configured Power BI Service, Gateway, and Scheduled Refresh for automated reporting.
- Performed SQL-based data validation and User Acceptance Testing (UAT), resolving reporting discrepancies with Finance and improving reporting accuracy.
- Optimized ETL processes using Power Query integrating SQL Server and Excel data sources.

Data Analyst | Alliance Tek Solutions (April 2023 – March 2025)

- Analyzed real-world business datasets from multiple industries using SQL, Python, Microsoft Excel, and Power BI to generate actionable business insights.
- Performed data extraction, cleaning, transformation, and validation to prepare high-quality datasets for analysis and reporting.
- Developed interactive dashboards and analytical reports to evaluate sales performance, customer segmentation, operational metrics, and business trends, enabling data-driven business decisions.
- Wrote SQL queries to retrieve, join, aggregate, and validate data from relational databases, ensuring reporting accuracy and consistency.
- Applied exploratory data analysis (EDA) and statistical techniques to identify trends, patterns, and opportunities that support data-driven decision-making.
- Collaborated with senior data analysts and project managers on client analytics projects, translating business requirements into analytical solutions and communicating findings to stakeholders.

Senior Research Specialist (Biological Data Analyst, Healthcare Data Analyst) | University of Michigan Medical School (April.2017- July.2022)

- Led independent research projects in molecular biology and epigenetics.
- Analyzed large-scale sequencing, ChIP-seq, proteomics, and experimental datasets using computational and statistical approaches to support biological discovery.
- Applied statistical analysis and scientific visualization to support research decisions.
- Presented findings, trained researchers and students, and co-authored multiple peer-reviewed publications.

Computational Biology Research Assistant | University of Michigan (January 2016 – April 2017)

- Collected and analyzed cancer mutation datasets from public genomic databases including COSMIC.
- Classified cancer-causing and non-cancer mutations using Python.
- Created analytical visualizations supporting cancer genomics research and future machine learning development.
- Presented project findings to the Principal Investigator.

Education

M.S., Biotechnology
Al-Farabi Kazakh National University
B.S., Biology
Al-Farabi Kazakh National University

Certifications

Microsoft Certified: Power BI Data Analyst Associate (PL-300)

Microsoft Fabric Analytics Engineer Associate (DP-600) – In Progress
